

Travel Concierge Agent:

Travel Concierge Agent which consists of three agents (city selection, Local Expert, Travel concierge agent) that prepares the itineraries for the specified date based on user preferences.

Input Prompt:

```
python3 cli_app.py -o "Stockholm, Sweden" -d "Italy" -s 2025-05-01 -e 2025-05-3 -i "2 adults who loves Food, beaches, adventure activities and hotel with swimming pool" -b 4000
```

City Selection Agent:

Given the destination as Italy, this agent comes up with the list of cities with user preference and flight prices. Finally chooses the city based on the user preference and minimum travel cost.

Local Expert Agent:

This agent is designed to get information about the hidden gem that only local people know about it in the chosen city, historic landmarks and comes with the high-level cost. This agent mimics like local guide.

Travel Concierge Agent:

This agent creates the whole iternary for the trip with actual hotels to stay, places to visit and restaurants to eat along with the cost.
